

## **\*\*\*Special Notice\*\*\***

Over the next several days the large pond in the Commons will be drained, completely. It will remain completely drained for several weeks. The draining of the pond will start the efforts of the Board to excavate the pond to depths that will create a healthier pond for the wildlife and fish while improving the aesthetics of the Commons.

Work will begin on the excavation several weeks after the draining. Completely dry soil will enhance the prospects for the success of the project as well as minimize the costs.

The AHHA board seeks your cooperation in staying out of the pond and away from any construction activity. The safety of the members is our biggest concern while this project is active. Please remind your children to stay out of the area under construction.

The Board would like to thank the members for their consideration in staying out of the area near the bridge while the dam between the two ponds was being rebuilt. The Board seeks the same level of cooperation for this longer and larger project.
